New Addition to the Editorial team

We are pleased to announce that the Editorial team has been joined by Thomas Wernberg from the University of Western Australia. Thomas will be co-Editor-in-Chief, working together with the existing Editors-in-Chief Elisabeth Gross and Jan Vermaat.

We welcome Thomas on board and look forward to continue working together with this excellent Editorial group.

Journal Team
Aquatic Botany

Thomas Wernberg

Thomas Wernberg graduated with a MSc in Environmental Biology and Geography from Roskilde University (Denmark) in 1998 and subsequently a PhD with Distinction in Marine Botany from the University of Western Australia in 2003. After postdoctoral positions and research fellowships at the University of Adelaide (2004-2005) and Edith Cowan University (2005-2010) he returned to the University of Western Australia, where he is now an Australian Research Council Future Fellow and Research Associate Professor in the UWA Oceans Institute and the School of Plant Biology. Thomas' research focus on the ecology of seaweed dominated temperate marine ecosystems. His approach bridges biogeography, ecology and physiology, and he aims to provide general knowledge and information needed to ameliorate the impacts of humans in marine ecosystems now and in the future. Detecting impacts of climate change and climate variability, and understanding the associated threats to ecosystem functioning are current research priorities.
